### **Debt Service Funds**

The debt service fund is used to account for the accumulation of resources and payment of general obligation bond principal and interest from governmental resources and principal and interest payments on capital lease obligations.

### **2013 Pass-Through Toll Revenue and Limited Tax Refunding Bonds**

The function of this fund is to accumulate monies for payment of pass-through toll revenue and limited tax bonds, which are serial bonds due in annual installments, payable through fiscal year 2026. Proceeds from the sale of these bonds are being used designing, developing, financing, and constructing a non-toll project for State Highway 289. Using a Pass-Through Toll Agreement, funds will be provided by the Texas Department of Transportation on an annual basis to cover most of the annual debt service payments. Property taxes are levied to finance a small portion of the debt service. Property taxes levied in excess of actual requirements are legally restricted to servicing this debt until the bond issue is retired.

## **Enterprise Fund**

Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprises - where the intent of the government's council is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or where the government's council has decide that periodic determination of net income is appropriate for accountability purposes. The County uses this fund to account for its airport operations.

**North Texas Regional Airport** - to account for the operation of the North Texas Regional Airport. All activities necessary to provide for the Airport's services are accounted for in this fund, including, but not limited to, administration, operations, and maintenance.
